WoodPlus Coatings

After many months of market research for our stain, we decided the best product to use on our log cottage was the WoodPlus product.

Our cottage has been treated since 2003 and we are very satisfied with the results after 4 years of exposure to the extreme climate of the Haliburton forest. Comparable cottages in the area do not appear to have stood up the same.

We highly recommend this product as your coating choice. You will be extremely pleased with the long standing beauty and durability.
